Objective

AI/ML engineering student experienced in machine learning, multi-agent systems, explainable AI, and production-grade LLM applications. Passionate about designing intelligent systems that solve real-world business problems through data-driven decision making.

Experience

- **Viswam AI**
Tech Lead Intern
Served as Tech Lead in an 8-week Summer of AI Internship, driving technical guidance and team support.
- **TechSaksham (Microsoft & SAP Initiative)**
Intern
Worked on AI/ML concepts including data analysis, model development, and practical industry applications under the Microsoft–SAP TechSaksham initiative.
- **Nexovate 2k25**
Overall-Coordinator
Led a national-level innovation event, managing teams, operations, and overall execution.
- **JPMorganChase**
JPMorganChase Investment Banking Job Simulation on Forage
Identified a suitable M&A target, valued it using a DCF model, and prepared a 2-page client summary.
- **IEEE Student Branch @GCET**
Chairperson
Led and managed IEEE student branch activities, organizing technical events and workshops. Coordinated teams, partnerships, and initiatives to promote innovation and learning.

Education

- B.Tech CSE-(AI&ML) 7.89 2023-Present
- Intermediate 95.4% 2021-2023
- Secondary Education 10 2021

Skills

- **Languages:** Python, Java
- **AI/ML:** Machine Learning, Deep Learning, LLMs, Agentic AI, RAG, Multi-Agent Systems, Explainable AI
- **Libraries:** Scikit-Learn, Pandas, NumPy, XGBoost, PyTorch
- **Frameworks:** LangChain, LangGraph, Ollama
- **Tools:** FastAPI, Vector Databases, APIs, WebSockets
- **Concepts:** Prompt Engineering, Autonomous Agents, System Design, Model Explainability.

Projects

- **Healthcare Risk Intelligence Platform**
Built an enterprise-grade healthcare intelligence platform for disease risk prediction using ensemble machine learning models. Implemented **Explainable AI** with **SHAP** and **LIME** for transparent decision-making and integrated a fine-tuned **Llama 3** model with **RAG** to deliver personalized clinical recommendations and evidence-backed healthcare insights.
Tech: XGBoost, LightGBM, SHAP, LIME, Llama 3, LangChain, FastAPI, React, PostgreSQL
Deployed live system: <https://healthrisk-ai.vercel.app>
- **Disaster Response Multi-Agent AI System**
Developed a real-time multi-agent system that coordinates disaster response through planning, resource allocation, communication, and decision-making agents. Implemented orchestration, consensus mechanisms, checkpoints, and fault-tolerant workflows.
Tech: LangGraph, FastAPI, Python, Multi-Agent Systems
Deployed live system: <https://disaster-response-ai-510c.onrender.com>
- **Sahayak AI**
Built a multilingual AI assistant that helps teachers generate lesson plans, worksheets, quizzes, and visual learning content. Integrated **LLMs**, voice interaction, and multimodal inputs (text, image, and speech) to support low-resource classrooms across India.
Tech: React, Firebase, Gemini AI, Supabase, TypeScript
Live: <https://sahayak-ai-assistant-7d448.web.app/dashboard>
- **Autonomous Research AI Agent**
Built an autonomous research assistant capable of query expansion, source credibility scoring, semantic clustering, and temporal relevance analysis. Generates structured research reports from multiple trusted sources with minimal human intervention.
Tech: LangChain, RAG, Vector Databases, LLMs, Python
GitHub: <https://github.com/Achyuth69/AI-Agent-for-Research-Automation>

Achievements & Awards

- **Finalist** – Tech Mahindra AI Days 2025(National-Level Event)
- **Merit Certificate** – MERN Stack Development (Brain O Vision) 2025
- **Participant at ISRC 2023** - By WestFord University
- Participant at **Geenovate 2024**

Languages

- Telugu, Hindi, English
